Product Designer at Beekeeper

Full time · Zürich, Switzerland · Jan 2019 - Sept 2020 · 1 yr 9 mos

Beekeeper is a SaaS company with more than 150 employees. Its mission is to help frontline workers do their job easier and feel appreciated. As a Product Designer, I was our users' advocate throughout the design process. I conducted research and designed user interfaces - from early concepts and prototypes to final visuals and animations. I was also responsible for creating and maintaining our Design System.

- Persona creation
- User journey mapping
- Coding (HTML, CSS, JS)
- UX writing
- Workshop facilitation
- Critical thinking
- Trainings
- UX mentoring
- Design systems

Awards

I won first place at the Outstanding Thesis Award of Corvinus University in 2016.

Hobbies

I like cooking, hiking or just walking in nature, swimming and cycling. I really enjoy the process of making tea - even more than drinking it. I love reading and writing about design and technology, playing around with new apps and design tools. I like the smell of old books, and playing cards & all kinds of board games.

Graphic & UI Designer

Freelance · Mar 2012 - Mar 2016 · 4 yrs 1 mo

I designed print and digital materials (posters, flyers, invitations, magazines, maps, flags, logos, social media covers, websites, videos, etc.) for various clients. Some of them I did as a member of a design team in a student organization.

Education

Marketing (MSc)

Corvinus University of Budapest · 2014 - 2016

In my thesis, I analyzed the post complaint customer experience and calculated the proper amount of compensation needed in different customer service scenarios.

Business Administration and Management (BA)

Corvinus University of Budapest · 2010 - 2014

I wrote my thesis about the water management of SMEs in the food industry.

Academic publications

What is the Price of a Service Failure?

Marketing & Management · Coauthor: Zsófia Kenesei · 2016

The study aims to examine the role of compensation in service recovery based on the justice theory. Our paper investigates the expected distributive justice, namely the tangible compensation after a service failure.
